

TableCell.VerticalMerged

Description

Returns or sets a boolean that represents if this cell is merged with one or more cells vertically. The first cell will contain all the content.

C#

```
public boolean VerticalMerged{ get; set; }
```

vb.net

```
Public Property VerticalMerged() As Boolean
```

Examples

C#

```
//--- Return VerticalMerged
    bool merged = cell.VerticalMerged;

    //--- Set VerticalMerged
    cell.VerticalMerged = true;
```

vb.net

```
'--- Return VerticalMerged
    Dim merged As Boolean = cell.VerticalMerged

    '--- Set VerticalMerged
    cell.VerticalMerged = True
```
