Worksheet.NamedRanges

Description

Returns the named ranges of the Worksheet as an array of NamedObject objects as an `IEnumerable` collection. Though the named ranges are not returned in any particular order, they iterable.

C#

```
public System.Collections.Generic.IEnumerable<NamedObject> NamedRanges{ get; }
```

---

vb.net

```
Public ReadOnly Property NamedRanges() As System.Collections.Generic.IEnumerable(Of
NamedObject)
```

Examples

C#

```
NamedObject[] ranges = ws.NamedRanges;
```

---

vb.net

```
Dim ranges as NamedObject() = ws.NamedRanges
```
