

Chart.PositionInCollection

Description

Returns the 0-based position in the parent Charts collection. If this Chart is on its own Chartsheet, then this will return 0.

C#

```
public int PositionInCollection{ get; }
```

vb.net

```
Public ReadOnly Property PositionInCollection() As Integer
```

Remarks

For charts that have been removed from a worksheet, or charts in a worksheet that has been deleted, this property will return -1.
