

Style.WrapText

Description

Sets or returns if text that is larger than the width of the cell will be wrapped, increasing the height of a cell.

C#

```
<p> public boolean WrapText{ get; set; }</p>
```

vb.net

```
<p>Public Property WrapText() As Boolean</p>
```

Examples

C#

```
//--- Get WrapText
    bool wrap = styl.WrapText;

    //--- Set WrapText
    styl.WrapText = true;
```

vb.net

```
'--- Get WrapText
    Dim wrap As Boolean = styl.WrapText

    '--- Set WrapText
    styl.WrapText = True
```
