

TableCell.Merged

Description

Sets or returns whether this cell has been merged with a preceding horizontal cell.

C#

```
public boolean Merged{ get; set; }
```

vb.net

```
Public Property Merged() As Boolean
```

Examples

C#

```
//--- Return Merged
    bool merged = cell.Merged;

    //--- Set Merged
    cell.Merged = true;
```

vb.net

```
'--- Return Merged
    Dim merged As Boolean = cell.Merged

    '--- Set Merged
    cell.Merged = True
```
