TableCell.Merged

Description

Sets or returns whether this cell has been merged with a preceding horizontal cell.

C#	
<pre>public boolean Merged{ get; set; }</pre>	
vb.net Public Property Merged() As Boolean	

Examples

C#

```
//--- Return Merged
    bool merged = cell.Merged;
    //--- Set Merged
    cell.Merged = true;
```

vb.net

```
'--- Return Merged
Dim merged As Boolean = cell.Merged
'--- Set Merged
cell.Merged = True
```
