

# ListEntry.BulletText

## Description

Sets or returns a `String` representing the bullet text of this entry as it would show up if it was opened in Word.

**C#**

```
public System.String BulletText{ get; }
```

**vb.net**

```
Public ReadOnly Property BulletText() As String
```

## Examples

**C#**

```
string bulletText = entry.BulletText;
```

**vb.net**

```
Dim bulletText As String = entry.BulletText
```

## Examples
