

# DocumentProperties.Author

## Description

Sets or returns the author of the presentation. The author property can be used to search for a PowerPoint file.

### C#

```
<p> public System.String Author{ get; set; }</p>
```

### vb.net

```
<p>Public Property Author() As String</p>
```

## Examples

### C#

```
//--- Get Application
    string author = docProps.Author;

    //--- Set Author
    docProps.Author = "J. Smith";
```

### vb.net

```
'--- Get Application
    Dim author As String = docProps.Author

    '--- Set Author
    docProps.Author = "J. Smith"
```
