## **DocumentProperties.Company**

## **Description**

Sets or returns the value of the Company field in a workbook's Properties sheet. Windows can search for an Excel file using this value.

```
C#
 public System.String Company{ get; set; }
```

```
vb.net
Public Property Company() As String
```

## **Examples**

```
C#

//--- Get Company
string company = docProps.Company;

//--- Set Company
docProps.Company = "SoftArtisans";
```
