

Worksheet.ProtectPasswordHash

Description

Sets or returns the password hash that is used to write-protect (not encrypt) the worksheet.

C#

```
public int ProtectPasswordHash{ get; set; }
```

vb.net

```
Public Property ProtectPasswordHash() As Integer<
```

Examples

C#

```
//--- Get ProtectPasswordHash
int passwordHash = ws.ProtectPasswordHash;

//--- Set ProtectPasswordHash
ws.ProtectPasswordHash = 12345;
```

vb.net

```
'--- Get ProtectPasswordHash
Dim passwordHash = ws.ProtectPasswordHash

'--- Set ProtectPasswordHash
ws.ProtectPasswordHash = 12345
```
