CharacterRun.ModifiedBy

Description

Returns a `String` that represents the name of the author who inserted the text in this character run (if revision tracking was on when it was modified).

C#

```
public System.String ModifiedBy{ get; }
```

vb.net

```
Public ReadOnly Property ModifiedBy() As String
```

Examples

C#

```
string modifiedBy = oCharacterRun.ModifiedBy;
```

vb.net

```
Dim modifiedBy As String = oCharacterRun.ModifiedBy
```
