

DataImportProperties.MaxRows

Description

Returns or set an int that represents the maximum number of rows to be imported. If more rows than this are in the data source, the extra ones will be ignored.

C#

```
public int MaxRows{ get; set; }
```

vb.net

```
Public Property MaxRows() As Integer
```

Examples

C#

```
//--- Return MaxRows
    int rows = importProps.MaxRows;

    //--- Set MaxRows
    importProps.MaxRows = 50;
```

vb.net

```
'--- Return MaxRows
    Dim rows As Integer = importProps.MaxRows

    '--- Set MaxRows
    importProps.MaxRows = 50
```
