

TableCell.ApplyParagraphFormatting(ParagraphFormatting)

Description

Applies [ParagraphFormatting](#) to all paragraphs in this TableCell. The ParagraphFormatting will not be applied to paragraphs inside nested tables.

C#

```
public void ApplyParagraphFormatting(ParagraphFormatting formatting)
```

vb.net

```
Public Sub ApplyParagraphFormatting(ByVal formatting As ParagraphFormatting)
```

Parameters

formatting

A ParagraphFormatting object containing formatting properties to apply to the cell.

Examples

C#

```
tblCell1.ApplyParagraphFormatting(paraFormat);
```

vb.net

```
tblCell1.ApplyParagraphFormatting(paraFormat)
```
