

# PresentationSlides

## Description

Returns a [Slides](#) collection which provides access to all slides in the specified presentation.

### C#

```
public Slides Slides{ get; }
```

### vb.net

```
Public ReadOnly Property Slides() As Slides
```

## Remarks

Use the `Slides` object to manage the slides in a presentation.

## Examples

### C#

```
Slides slidess = pres.Slides;
```

### vb.net

```
Dim slides As Slides = pres.Slides
```
