

WordApplication.AlwaysUseUnicode

Description

Returns a boolean that represents whether or not WordWriter will write all text using unicode. A value of `false` can result in smaller file sizes but text that is not part of cp1252 (Windows-1252) will be unreadable. This is set to `true` by default. It is recommended that you should set this to `false` if it is known that only characters supported by Windows-1252 are in the document, especially when creating large documents.

C#

```
public boolean AlwaysUseUnicode{ get; set; }
```

vb.net

```
Public Property AlwaysUseUnicode() As Boolean
```

Examples

C#

```
//--- Return AlwaysUseUnicode
bool alwaysUseUnicode = oWordApplication.AlwaysUseUnicode;

//--- Set AlwaysUseUnicode
oWordApplication.AlwaysUseUnicode = false;
```

vb.net

```
'--- Return AlwaysUseUnicode
Dim alwaysUseUnicode As Boolean = oWordApplication.AlwaysUseUnicode

'--- Set AlwaysUseUnicode
oWordApplication.AlwaysUseUnicode = False
```
