

DataImportProperties.AutoFit

Description

Sets or returns a boolean representing whether or not the table that is automatically created for the imported data will automatically be sized to fit the data being imported.

C#

```
public boolean AutoFit{ get; set; }
```

vb.net

```
Public Property AutoFit() As Boolean
```

Remarks

This is set to false by default.

Examples

C#

```
//---- Return AutoFit
boolean fit = importProps.AutoFit;

//--- Set AutoFit
importProps.AutoFit = true;
```

vb.net

```
'--- Return AutoFit
Dim fit As Boolean = importProps.AutoFit

'--- Set AutoFit
importProps.AutoFit = True
```
