

Table.SetPreferredColumnWidthUnits(Int32, TableCell.WidthUnits)

Description

Sets a [TableCell.WidthUnits](#) object that represents the units used for the width of a particular column.

C#

```
public void SetPreferredColumnWidthUnits(int column, WidthUnits units)
```

vb.net

```
Public Sub SetPreferredColumnWidthUnits(ByVal column As Integer, ByVal units As WidthUnits)
```

Parameters

column

The column index for which to get the width units.

units

The preferred width units.

Remarks

MS Word equivalent: Table menu > Table properties... > Column tab > Size section > Column #: > Measure in:

Examples

C#

```
//--- Set the column width units for the 3rd column to percentage  
oTable.SetPreferredWidthUnits(2, TableCell.WidthUnits.Percentage);
```

vb.net

```
'--- Set the column width units for the 3rd column to percentage  
oTable.SetPreferredWidthUnits(2, TableCell.WidthUnits.Percentage)
```
