

DocumentProperties.Keywords

Description

Sets or returns keywords that can be used to search for the spreadsheet. In Excel, a file's keywords are displayed in the Summary page of the Properties sheet.

C#

```
<p> public System.String Keywords{ get; set; }</p>
```

vb.net

```
<p>Public Property Keywords() As String</p>
```

Examples

C#

```
//--- Get Keywords  
string keywords = docProps.Keywords;  
  
//--- Set Keywords  
docProps.Keywords = "ExcelWriter, WordWriter, OfficeWriter";
```

vb.net

```
'--- Get Keywords  
Dim keywords As String = docProps.Keywords  
  
'--- Set Keywords  
docProps.Keywords = "ExcelWriter, WordWriter, OfficeWriter"
```
