

# Othersheet

## Description

A [Othersheet](#) object represents a sheet that is not a worksheet or a chartsheet. This sheet represents VBA Module and dialog sheets. These are not currently implemented by ExcelWriter

### C#

```
<p> public sealed class Othersheet : Worksheet</p>
```

### vb.net

```
<p>Public NotInheritable Class Othersheet<br />  
    Inherits Worksheet</p>
```
