

PowerPointTemplate.RemoveExtraDataMarkers

Description

Sets whether PowerPointWriter should remove data markers in the template that do not bind to data sources in code.

C#

```
public boolean RemoveExtraDataMarkers{ get; set; }
```

vb.net

```
Public Property RemoveExtraDataMarkers() As Boolean
```

Remarks

By default, if a data marker does not bind to a data source, PowerPointWriter will throw an exception. If RemoveExtraDataMarkers is set to true, PowerPointWriter will remove extra data markers silently.

RemoveExtraDataMarkers is a **Read/Write** property.

Examples

C#

```
//--- Setting RemoveDataMarkers to 'true' tells  
//--- PowerPointWriter to remove data markers that do not  
//--- bind to a data source.  
pptt.RemoveExtraDataMarkers = true;
```

vb.net

```
'--- Setting RemoveDataMarkers to 'True' tells  
'--- PowerPointWriter to remove data markers that do not  
'--- bind to a data source.  
pptt.RemoveExtraDataMarkers = True
```
