

Workbook.Palette

Description

Returns a [Palette](#) object that represents the specified workbook's color palette.

C#

```
public Palette Palette{ get; }
```

vb.net

```
Public ReadOnly Property Palette() As Palette
```

Remarks

Each Excel workbook has a single color palette that manages formatting colors and some drawing layer colors. A color palette contains 56 colors that may be referenced. Each of these 56 colors may be customized, but changing a color in the palette will affect all formatting that uses the referenced color.

Examples

C#

```
Palette pal = wb.Palette;
```

vb.net

```
Dim pal As Palette = wb.Palette
```
