

CompatibilitySettings.AlignRowsIndependent

Description

Sets or returns a boolean that represents whether or not Word will align table rows independently of one another in this document.

C#

```
public boolean AlignRowsIndependent{ get; set; }
```

vb.net

```
Public Property AlignRowsIndependent() As Boolean
```

Remarks

MS Word equivalent: Tools menu > Options... > Compatibility tab > Compatibility options for [filename].doc section > Options > Align table rows independently

Examples

C#

```
//--- Return AlignRowsIndependent  
bool alignRowsIndependent = cs.AlignRowsIndependent;  
  
//--- Set AlignRowsIndependent  
cs.AlignRowsIndependent = true;
```

vb.net

```
'--- Return AlignRowsIndependent  
Dim alignRowsIndependent As Boolean = cs.AlignRowsIndependent  
  
'--- Set AlignRowsIndependent  
cs.AlignRowsIndependent = True
```
