

WordChangeTracking.LockRevisionMarkingState

Description

Sets or returns a `boolean` that represents whether or not the current revision tracking state is locked.

C#

```
public boolean LockRevisionMarkingState{ get; set; }
```

vb.net

```
Public Property LockRevisionMarkingState() As Boolean
```

Examples

C#

```
//--- Return LockRevisionMarkingState
    bool lockRevisionMarkingState = changeTracking.LockRevisionMarkingState;

    //--- Set LockRevisionMarkingState
    changeTracking.LockRevisionMarkingState = true;
```

vb.net

```
'--- Return LockRevisionMarkingState
    Dim lockRevisionMarkingState As Boolean =
changeTracking.LockRevisionMarkingState

    '--- Set LockRevisionMarkingState
    changeTracking.LockRevisionMarkingState = True
```
