

DocumentProperties.Title

Description

Sets or returns the value of the Title field in a workbook's Properties sheet. The title property can be used to search for an Excel file.

C#

```
<p> public System.String Title{ get; set; }</p>
```

vb.net

```
<p>Public Property Title() As String</p>
```

Examples

C#

```
//--- Get Title
    string title = docProps.Title;

    //--- Set Title
    docProps.Title = "Employees";
```

vb.net

```
'--- Get Title
    Dim title As String = docProps.Title

    '--- Set Title
    docProps.Title = "Employees"
```
