

# Worksheet.DeleteRow(Int32)

## Description

Deletes a specified row and its contents from the worksheet. Rows below the deleted row will be moved up.

### C#

```
public void DeleteRow(int rowNumber)
```

### vb.net

```
Public Sub DeleteRow(ByVal rowNumber As Integer)
```

## Parameters

### *rowNumber*

The 0-based number of the row to remove.

## Examples

### C#

```
ws.DeleteRow(70);
```

### vb.net

```
ws.DeleteRow(70)
```
