

# PageSetup.PrintTitles

## Description

Returns the [Range](#) of cells that contains the print titles. This range will contain up to two [Area](#) s, one for print title rows and another for the print title columns. These are the rows and columns that will be repeated on each printed page.

*(This is not supported for charts.)*

**C#**

```
public Range PrintTitles{ get; }
```

**vb.net**

```
Public ReadOnly Property PrintTitles() As Range
```

## Examples

**C#**

```
Range prntTitles = ps.PrintTitles;
```

**vb.net**

```
Dim prntTitles As Range = ps.PrintTitles
```
