

# Cell.Comment

## Description

Returns a [Comment](#) object representing a note attached to the cell, separate from other cell content. If a comment is not associated with the specified cell, a new comment will be created and returned.

**C#**

```
public Comment Comment{ get; }
```

**vb.net**

```
Public ReadOnly Property Comment() As Comment
```

## Examples

**C#**

```
Comment cmt = cellA1.Comment;
```

**vb.net**

```
Dim cmt As Comment = cellA1.Comment
```
