

Cell.IsMerged

Description

Returns whether or not the [Cell](#) is a merged cell.

C#

```
public boolean IsMerged{ get; }
```

vb.net

```
Public ReadOnly Property IsMerged() As Boolean
```

Examples

C#

```
ExcelApplication xla = new ExcelApplication();  
bool isMerged = wb.Worksheets[0].Cells[0, 0].IsMerged;
```

vb.net

```
Dim xla As New ExcelApplication()  
bool isMerged = wb.Worksheets(0).Cells(0, 0).IsMerged
```
