

Charts.AddChart(Chart, Anchor)

Description

Creates a copy of the specified chart and adds it to the current worksheet. This method allows you to add a chart from an external workbook to the worksheet, or to duplicate a chart within a single workbook. The properties and settings on the original chart will be preserved

C#

```
public void AddChart(Chart chart, Anchor cornerTopLeft)
```

vb.net

```
Public Sub AddChart(ByVal chart As Chart, ByVal cornerTopLeft As Anchor)
```

Parameters

chart

The new Chart to add to the workbook.

cornerTopLeft

The location on the new worksheet to anchor the upper left corner of the chart.
