

# Style.ColumnInsertBehavior

## Description

A [ColumnInsertBehavior](#) value determines what style will be applied to the inserted columns.

**C#**

```
public sealed class ColumnInsertBehavior : TypesafeEnum
```

**vb.net**

```
Public NotInheritable Class ColumnInsertBehavior  
    Inherits TypesafeEnum
```

## Values

| Name   | Description                                                                    |
|--------|--------------------------------------------------------------------------------|
| Ignore | The default style will be applied to the new columns.                          |
| Left   | The style of the new columns will match the style of the column to their left  |
| Right  | The style of the new columns will match the style of the column to their right |
