

Style.RowInsertBehavior

Description

A [RowInsertBehavior](#) value determines what style will be applied to the inserted rows.

C#

```
public sealed class RowInsertBehavior : TypesafeEnum
```

vb.net

```
Public NotInheritable Class RowInsertBehavior  
    Inherits TypesafeEnum
```

Values

| Name | Description |
|--------|---|
| Above | The style of the new rows will match the style of the row above them. |
| Below | The style of the new rows will match the style of the row below them. |
| Ignore | The default style will be applied to the new rows. |
